Professional Summary

Full Stack Developer specializing in React, Node.js, MongoDB, AI-powered applications, and real-time collaborative systems. Experienced in building Retrieval-Augmented Generation (RAG) platforms, JWT-based authentication systems, scalable backend services, and Dockerized applications.

Education

Parul University, Vadodara
B.Tech in Computer Science and Engineering

Aug 2023 – June 2027
CGPA: 8.58

Projects

AI Second Brain (RAG Platform)

[\[Repo\]](#)

Tech Stack: React, Node.js, Express, MongoDB, LangChain, Pinecone, Docker

- Built an AI-powered learning platform using Retrieval-Augmented Generation (RAG) to provide context-aware responses from uploaded PDF documents.
- Developed document ingestion pipelines using Multer, pdfjs-dist, LangChain text splitters, OpenAI embeddings, and Pinecone vector search for semantic retrieval.
- Designed isolated multi-session chat architecture with JWT authentication, persistent chat history, flashcard generation, MCQ testing, and weak-topic analytics.
- Modeled MongoDB collections for users, sessions, uploaded files, flashcards, and performance tracking across study workflows.
- Containerized frontend and backend services using Docker and implemented scalable deployment-ready architecture.

CollabBoard - Real-Time Collaborative Whiteboard

[\[Repo\]](#)

Tech Stack: React, TypeScript, Tldraw, Node.js, MongoDB, Socket.io, JWT

- Engineered a real-time collaborative whiteboard using room-based WebSocket communication for synchronized multi-user drawing and cursor tracking.
- Implemented JWT authentication, board ownership controls, secure room access, and MongoDB persistence for canvas recovery and collaboration history.
- Built a decoupled client-server architecture using React, TypeScript, Express, Socket.io, and MongoDB for scalable collaboration workflows.
- Integrated Tldraw SDK with board CRUD APIs and persistent storage, enabling users to resume work seamlessly across sessions.

Technical Skills

Languages: Java, JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, TypeScript, Tailwind CSS, HTML5, CSS3, Vite

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io

Databases: MongoDB, MySQL, Pinecone Vector Database

Cloud & Tools: Microsoft Azure, Docker, Git, GitHub, Postman

Concepts: Data Structures & Algorithms, OOP, System Design, RAG, WebSockets, Client-Server Architecture

Certifications

- **Microsoft Certifications:** Azure Administrator Associate (AZ-104) , Azure AI Fundamentals (AI-900) , Azure Data Fundamentals (DP-900) , Security, Compliance, and Identity Fundamentals (SC-900) , Azure Fundamentals (AZ-900)
- **NPTEL Certifications:** Elite Certification: Computer Networks and Internet Protocol

Achievements

- **Open Source Contributions:** Contributed to PrivateBoard, an open-source collaborative platform, by implementing features and resolving issues through 2 merged pull requests.
- Solved 160+ Data Structures and Algorithms problems across arrays, linked lists, trees, graphs, recursion, and dynamic programming.
